ECS Configuration Change Request

CCR No. 97-0180	Logged Date 2/13/97	Rev. -	Request Type CCR

Priority Routine ☐ Urgent ☐ Emergency ☒	Affected Release	Change Class I I

Title (description)
Installation of HP hardware and COTS to support ICO development effort

Documents Affected	Source Nos (RID, NCR, Action Item, GSFC CCR, etc.) or Tech Reference

RTM Change ☐ **Start New Baseline** ☐

Problem
Development work for the ICO project is being performed on Suns; however, the target platform for mission operations is an HP. Recently, HITS in Denver procured an HP computer for Landover to use for unit testing. In addition, Denver acquired the following software packages: SoftBench C++ compiler, RogueWave Tools.h++, DBTools.h++, Sybase OpenClient, Netscape and HP/UX OS v 10.20. Unit testing schedules will slip if the HP hardware and software are not installed in a timely manner.

Proposed Solution
Install and configure the HP hardware in room #2134B (Guy Swope) and connect it to the network. Install and configure SoftBench C++, Roguewave Tools.h++, DBTools.h++, Sybase OpenClient, Netscape and HP/UX OS v 10.20.

Tony Cetuk (3092B, x0421) has all the hardware and software packages..
